

KAESER AIR SERVICE **Our Services – An Overview**

Tailored solutions

As one of the most versatile sources of energy available, compressed air plays a key role in ensuring efficient production for a wide range of applications. However, there is more to getting the most out of this medium than by simply using high-performance components. Optimum performance is achieved by using a system solution that is perfectly tailored to suit the needs of the specific application – the benefits speak for themselves: exceptional energy-efficiency, reliability, constant availability and dependable air quality.

Our objective: Maximum user benefit

Our wide range of services enables us to provide you, the user, with an air supply that meets your exact requirements. KAESER is with you every step of the way right from initial contact through to advisory discussions, subsequent air demand analysis, planning, installation and after-sales care. KAESER's Energy Saving System (KESS) evaluates the information gathered from the computer-aided Air Demand Analysis (ADA) to determine the most efficient compressed air system for your company's individual needs. Furthermore, we can provide you with CAD illustrations showing you the actual system layout as it would be when installed. We can carry out partial installation, or installation as a turnkey project depending on your requirements. A choice of service agreements is available to suit your circumstances. Or, instead of investing in a compressed air system, you could just buy the air you need, when you need it, by taking advantage of KAESER's SIGMA AIR UTILITY air contracting service. With support from Kaeser's extensive service network, you are safe in the knowledge that consumable and replacement parts are quickly available and that a qualified service technician is never far away.

Our Services – An Overview

KAESER has the solution

Kaeser offers a comprehensive range of services that allows you to select a compressed air system that meets your company's exact needs and which provides the best possible cost/use ratio.

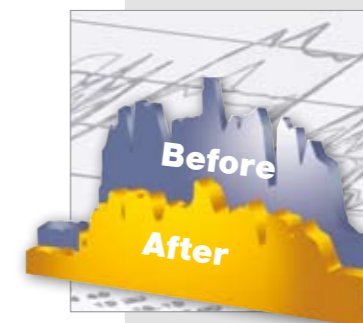

Customer Service

Customer service at KAESER includes much more than you'd think. Our services include installation and commissioning, inspection, maintenance and repair, disposal, 24-hour service, hotline assistance and pressure vessel inspections.

Genuine KAESER parts

As with all KAESER products, consumable and spare parts are quality tested to ensure best possible performance. Be safe in the knowledge that all components are guaranteed and are designed to meet the demands of the applicable operating conditions. Long-term compressed air system efficiency and reliability can be ensured by using only genuine KAESER parts.

Advice and analysis

For a compressed air system to be truly cost-effective it must be precisely matched to suit the specific application. This is where system advice and computer-aided Air Demand Analysis (ADA) from KAESER play a key role.

Project engineering

Using the data gathered from the air demand analysis, KAESER will design a highly reliable and efficient compressed air system that is especially tailored to meet your company's specific needs.

Service agreements

Even the best machines can't last indefinitely without expert service and maintenance. Use the experience and knowledge of our highly-qualified specialists to your advantage and benefit from our wide range of attractive offers.

SIGMA AIR UTILITY

With SIGMA AIR UTILITY, there's no need to invest in a compressed air system – simply pay for the compressed air you need. This innovative approach provides users with fixed price compressed air at the required quality and ensures optimum cost transparency.

Worldwide sales and service network: KAESER – Always there

With over 3500 employees worldwide, Kaeser is one of the world's foremost compressor manufacturers and providers of compressed air systems. Kaeser is represented in every major industrial nation throughout the world by 38 subsidiary companies and 48 authorised partners.
